Chief Technology Officer (CTO) | AI, SaaS, Digitalization & Enterprise Transformation Leader

Executive Summary

Strategic technology executive with 28+ years of experience driving enterprise-scale transformation across SaaS, manufacturing, and engineering domains. Proven ability to **scale platforms, teams, and revenue across global markets**, delivering business-aligned technology solutions.

Rare cross-domain leader bridging **engineering, manufacturing, and SaaS**, with strong ownership of **product strategy, revenue enablement, and enterprise modernization**. Experienced in working with CEOs, founders, and boards to drive growth, innovation, and global expansion.

Enterprise Impact & Value Creation

- Transformed product from **SMB to enterprise-ready SaaS platform**, enabling global expansion across US, Europe, and Japan
- Increased average customer renewal from **$2K–$5K → $35K+**, significantly improving ARR potential
- Introduced **consumption-based pricing**, improving deal conversion and profitability visibility
- Enabled **enterprise-scale deployments (1K → unlimited users)**
- Delivered **30–70% cost optimization** through architecture modernization
- Built AI-driven systems improving **customer retention, adoption, and product differentiation**

Product & Technology Leadership

- Owned **end-to-end product and technology strategy** aligned with business growth objectives
- Defined roadmap across **AI, BI, NLP, SaaS analytics, and enterprise platforms**
- Partnered with **sales, pre-sales, and customers** to drive product-market fit and enterprise deals
- Positioned products as **AI-first, real-time analytics-driven platforms**
- Led transition from traditional BI to **NLP-based conversational analytics**

Executive & Board Engagement

- Worked directly with **CEO, founders, and executive leadership** on strategy and growth
- Presented **technology roadmap, transformation progress, and business impact** regularly
- Influenced decisions across **product, expansion, hiring, and infrastructure investments**
- Led expansion strategy across **India and international locations (e.g., Moldova)**
- Operated as **CTO-equivalent leader** in enterprise transformation environments

Professional Experience

OpenLM, India | Tribe Lead (CTO Track Role – SaaS & AI Transformation)

Sept 2022 – Present

Key Contributions:

- Transformed legacy system into **scalable, multi-tenant SaaS platform**
- Built **real-time analytics platform** using Spark & Kafka
- Introduced **AI-driven development, testing, and DevOps automation**
- Developed **NLP-based reporting interface (conversational analytics)**
- Redesigned pricing to **consumption-based licensing model**

Impact:

- Increased release cycle from **1–2/year → daily deployments**
- Reduced development effort by **30–50%**
- Reduced downtime by **50%**, support tickets by **20%**
- Enabled **instant onboarding (1 week → near real-time)**

- Scaled team from **3 → 80+ members**

Gunung Raja Paksi, Indonesia | Head – Business Process (CTO-Equivalent Role)

2019 – 2022

- Led digital transformation of large steel enterprise transitioning to public company
- Re-architected ERP across 25+ departments
- Built AI-driven procurement and analytics platform

Impact:

- Delivered **$1M+ annual savings**
- Reduced procurement cycle from **months → days**
- Improved inventory movement by **80%**
- Enabled **data-driven board-level decision making**

Tata Steel, India | Senior Manager – Industry 4.0 & Virtual Engineering

2015 – 2019

- Introduced **drone, LiDAR, BIM, and digital twin systems**
- Led engineering digitization initiatives

Impact:

- Recovered **~30% revenue leakage**
- Reduced engineering rework by **20%**

M. N. Dastur & Co. | Tech Lead

2005 – 2015

- Digitized engineering workflows and implemented BIM systems

Impact:

- Reduced workforce dependency by **68%**
- Improved delivery efficiency significantly

Core Competencies

- Technology Strategy & Business Alignment
- SaaS Platforms & Microservices Architecture
- AI/ML & Real-Time Analytics
- Product Strategy & Roadmap Ownership
- Revenue Optimization & Pricing Strategy
- Industry 4.0 & Digital Transformation
- Global Team Leadership & Scaling
- Stakeholder & Board Management

Technology Stack

Architecture: Microservices, Event-driven systems, SaaS platforms
Data & AI: Spark, Kafka, Airflow, NLP, Ni-Fi, Predictive Analytics, Superset, QuickSight, Power BI
Cloud & DevOps: AWS, Azure, Kubernetes, CI/CD
Enterprise: SAP, Oracle, RPA

Thought Leadership

- Author of *Mastering 3D Plant Engineering, Digitalisation & Automation*
- Focus on engineering digitization, BIM, and automation
- Used by industry professionals and transformation leaders

Education & Certifications

- Master's in Computer Applications
- PG Diploma in IT
- Bachelor of Arts
- Diplomas in Civil Engineering
- Diplomas in Rail & Transport Management
- Six Sigma Green Belt | PMP
- AI/ML, BI, RPA Certifications
